Phone: +8801610772313

GitHub/Portfolio: <https://farhan22025.github.io/>

Research Interests

- Machine Learning
 - Computer Vision
 - Deepfake Detection
 - **AI Security**
 - **Image Forensics**
-

Education**Bachelor of Science in Software Engineering (Major: Data Science)**

Daffodil International University, Bangladesh

Expected Graduation: June 2026

CGPA: 3.05 / 4.00 (expected)

Relevant Coursework:

- Machine Learning for Image Analysis
 - Data Analysis and Processing
 - System Design and Software Engineering
-

Research Experience

Undergraduate Thesis: "Lightweight Deepfake Image Detection Using Machine Learning"

- Designing and developing a lightweight machine learning model for offline deepfake detection for detecting manipulated images
 - Focused on efficient detection in low-resource environments
 - Applying image processing and classification techniques
-

Projects

Smart Waste Management System (Capstone Project)

- Designed system architecture using SRS, UML, and ERD
- Focused on data-driven optimization of waste management processes

Coffee Shop Management System (Java)

- Built a POS system for order processing and sales tracking
 - Applied object-oriented programming principles
-

Technical Skills

- **Programming:** Python, R, Java, C, PHP
 - **Data & ML:** Machine Learning, Data Analysis
 - **Tools:** Excel, Google Sheets, MySQL
 - **Web:** HTML, CSS
 - **Systems:** Linux, macOS
-

Academic Activities

Member, DIU Data Science Club (Research Lab) (2022 – Present)

- Participating in research and machine learning projects
- Working on deepfake detection and data analysis
- Collaborating on research-oriented machine learning projects

Member, DIU Robotics Club (2024 – Present)

- Engaged in IoT and automation-based projects
-

Achievements

- Selected member of DIU Data Science Club Research Lab
 - Conducting research on machine learning-based deepfake detection
-

Languages

- Bengali (Native)
 - English (C1 – Advanced)
-
